**Overall Comments**

The Grade 7 and Grade 8 Gauss Contests are the first two in a series of mathematics contests created and administered by the Canadian Mathematics Competition and the Centre for Education in Mathematics and Computing. The 2006 offering of these Contests drew an enrollment of almost 87 000, mainly from Canadian schools, but also including some international schools.

The summary of results found in these pages is compiled from voluntarily submitted reporting forms. These results are based on returns representing just under one third of the total of enrolled students, and so can be viewed as reasonably representative of the actual results.

The average marks on each of the two Contests increased from 2005 to 2006: on the Grade 7 contest, from 86.22 to 89.87, and on the Grade 8, from 98.77 to 101.52. Both results are outstanding, and we hope that future papers will continue to garner similar results.

As it has always been in the past, the primary goals in setting the Contests is to provide a fun activity which also challenges students, and gives teachers an opportunity to work with their students on a mathematical activity outside the normal classroom routine. We extend our thanks to those students and teachers who participated this year, and hope that you will all continue to be active in such activities.

Congratulations to all participants, and especially to those named in this report. We look forward to your names, and others, appearing in future lists of participants.

**Commentaires généraux****Commentaires généraux**

Les concours Gauss de 7<sup>e</sup> et 8<sup>e</sup> année (Sec. I et II) sont les deux premiers concours d'une série de concours de mathématiques créées et administrées par le Concours canadien de mathématiques et le Centre d'éducation en mathématiques et en informatique. En 2006, ces concours ont mené à une inscription d'un peu plus de 87 000 étudiants, principalement d'écoles canadiennes mais incluant quelques écoles internationales.

Le sommaire des résultats, trouvé dans ces pages, est compilé de formulaires de rapport de résultats volontairement soumis. Ces résultats sont basés sur les retours représentant d'un tiers du total d'étudiants inscrits, et donc peut être vu comme représentant de façon raisonnable les résultats actuels.

La note moyenne de chacun des deux concours a augmenté de 2005 à 2006 : dans le concours de 7<sup>e</sup> année, de 86,22 à 89,87 et pour la 8<sup>e</sup> année de 98,77 à 101,52. Les deux résultats sont très bons, et nous espérons que les concours futurs continueront à représenter des tels résultats.

Comme cela a toujours été dans le passé, le but primaire du concours est de donner une activité amusante mais, qui défie aussi les étudiants et permet aux enseignants de travailler avec leurs étudiants sur une activité mathématique hors de la routine de salle de classe. Nous offrons nos remerciements aux étudiants et aux enseignants qui ont participé cette année et nous espérons que vous continuerez à être actifs dans de telles activités.

Félicitation à tous les participants, et surtout à ceux nommés dans ce rapport. Nous avons hâte de voir vos noms et ceux de d'autres, apparaître dans les listes futures de participants.
