Problem of the Week

Problem A

Student Cookies

Cook E. Doe School had a bake sale. At the sale, a package of 36 cookies cost $12. Four students decided to put their money together and buy one package. Kayden contributed $2, Kayah contributed $3, Kayla contributed $4, and Michelle contributed $3. Everyone wants to be fair when dividing up the package. How many cookies should each person get based on how much each paid?
