

Problem of the Week

Problem D

Another Average

The numbers 2124, 1984, 1742, 2344, 2074, and 1632 are each written on a card. Daniyal takes four of the cards and calculates the mean (average) of their numbers to be 2021. Determine the mean of the numbers on the remaining two cards.

EXTRA PROBLEM: Can you interpret the following picture puzzle?
